Using My Classrooms and a Class Home Webpage to Enhance the Class Experience

sometimes the appropriate tool really is pen and paper with all its imperfections.

for example "working problems" in technical technical courses is frequently done this way by teachers and instructors, even if one can later convert it into a slick software file of some kind.

A PDF scan of the paper handwork is appropriate to convey such information content.

Or talks given on handmade transparencies can be and still are used frequently in certain fields, but a color scan can make it "electronic" and easily shared.
